IS 450/650: Data Communications and Networks

Hands-on Data Communications Project Update Presentation

Goal of this Project Presentation:

The goal of this presentation is to get an update on your IS 450/650: Data Communications Research and Development project. Each group will make a class presentation on their project progress. The presentation must demonstrate your effort towards the final completion of this IS 450/650: Hands-on Data Communications Research and Development project.

Presentation Requirements:

Please prepare your presentation (power point slides) for 5 minutes and there will be question-answers for 1 minute. Your presentation should at least include the following aspects.

1. Include the device and its detailed specifications.
2. State why did you choose this specific device and for what purpose?
3. Elaborate any software/SDK you have installed to work with this device or to get access to the data and communication protocols.
4. Show us the data (raw data is preferred), screenshot will be fine at this moment.
5. Your plan for the successful completion of this project and specific contributions of each of the team members in the group.

Submission Procedure:

Each group should send me the power point slides of their specific presentation by noon on Tuesday, April 14. Please name the file using the last names of all team members (e.g., abc_xyz_pqr.ppt).
