

Your name:

1. The primary purpose of a transport layer port number is to
 - (a) identify a sending or receiving network interface on a LAN.
 - (b) identify a sending or receiving node on a network or internetwork.
 - (c) identify a sending or receiving process on a node.**
 - (d) all of the above
 - (e) none of the above

2. The primary purpose of an IP address is to
 - (a) identify a sending or receiving network interface on a LAN.
 - (b) identify a sending or receiving node on a network or internetwork.**
 - (c) identify a sending or receiving process on a node.
 - (d) all of the above
 - (e) none of the above

3. The primary purpose of a MAC address is to
 - (a) identify a sending or receiving network interface on a LAN.**
 - (b) identify a sending or receiving node on a network or internetwork.
 - (c) identify a sending or receiving process on a node.
 - (d) all of the above
 - (e) none of the above

4. The relation between transport layer PDUs and network layer PDUs is that
 - (a) transport layer PDUs carry network layer PDUs
 - (b) network layer PDUs carry transport layer PDUs**

Note: PDU = protocol data unit, e.g., a packet, a frame, a datagram, a segment, etc.
