Description

A Postdoctoral Research Associate position is available in the Belas Laboratory at the Center of Marine Biotechnology, University of Maryland Biotechnology Institute in Baltimore, Maryland (USA) to conduct research on the molecular mechanisms involving signal transduction, swarmer cell differentiation, and motility of Proteus mirabilis. The research requires experience in molecular microbiology, microbial genetics, protein biochemistry, and recombinant DNA methodology. Microscopy experience is a plus. Requires ability to work independently in the laboratory and demonstrated scientific writing capabilities.

This is a full time annual appointment, renewable contingent upon funding availability and satisfactory performance. Salary commensurate with experience.

Qualifications

REQUIRED:

Ph.D. in Molecular Biology, Microbiology, Biochemistry or related field.

PREFERRED:

Experience in microbial physiology or bacterial genetics.

To Apply

Send or email cover letter, curriculum vitae, along with the name and address of three references to:

M. Robert Belas Center of Marine Biotechnology University of Maryland Biotechnology Institute 701 East Pratt Street Baltimore, MD 21202 email: belas@umbi.umd.edu
