

I have always been interested in surrealism as an artistic movement, so for my second project, I have decided to create a presentation about surrealism as an art form. This leaves me open to many creative possibilities. It will be largely informative, but for a younger audience, so there will still be a bit of fun. I will likely include Dali's Destino as well as some other surrealist videos and I will highlight female surrealist artists. The layout will be an area with many clickable items, each giving a description or linking to a video. I hope that it will interest younger people who are interested in art, or anyone that wants a fun way to learn about art movements.
