Homework #7

1. (6 points) Consider the initial boundary value for the wave equation

$$\begin{aligned}u_{tt} &= u_{xx} & -\infty < x < \infty, & \quad t > 0, \\u(x, 0) &= f(x) & -\infty < x < \infty, \\u_t(x, 0) &= g(x) & -\infty < x < \infty,\end{aligned}$$

Take  $f(x)$  as shown, and  $g(x) = 0$ . Sketch the graphs of the solution  $u(x, t)$  at times  $t = 0.2, 0.5, 1, 2$ . Clearly mark the coordinates of significant points on your graphs.

2. (8 points) In the previous problem, take  $f(x) = 0$  and  $g(x)$  as shown. Sketch the graphs of the solution  $u(x, t)$  at times  $t = 0, 1, 2$ . Clearly mark the coordinates of significant points on your graphs.
