

## RESEARCH TECHNICIAN AVAILABLE IN *ENVIRONMENTAL CHEMISTRY*

**Qualifications:** B.S. or M.S. with laboratory scientific research experience in Environmental Engineering, Environmental Chemistry, Analytical Chemistry or related field. Skills and experience with analysis of PCBs and related organohalides is highly desirable. Suitable candidates must have extensive hands-on experience in sample handling and gas chromatographic techniques. Excellent communication and documentation skills required with familiarity with gas chromatographic data processing and presentation.

**Responsibilities:** We are seeking a full-time highly motivated Research Associate to join our efforts in research on the biological processes affecting the fate of organohalide contaminants such as polychlorinated biphenyls and chlorobenzenes in impacted sediments. Specifically candidate will extract PCBs and related contaminants from sediments, conduct analytical analyses by GC and interpret data. This will require troubleshooting and accurately documenting the method electronically and in lab notebooks, and data reporting. Experience in environmental microbiology is desirable. For additional information, visit <http://www.umbi.umd.edu/~sowers/>

**Salary:** Commensurate with experience

**Position available:** Immediately

**Applications:** Send curriculum vitae and name, title and addresses of three references to:

Department of Marine Biotechnology  
University of Maryland Baltimore County  
Human Resource Manager  
c/o Search FRA100410  
701 E. Pratt St., Suite 236  
Baltimore, MD 21202 USA

or

Email to: [sowers@umbc.edu](mailto:sowers@umbc.edu)

**Closing date:** Application review will begin October 15, 2010 and will continue until a suitable candidate is selected.
